

Other critical information about Vaccinations that needs to be known

- News reports which can be found on youtube include stunning censored interviews conducted by medical historian Edward Shorter for WGBH public television (Boston) and Blackwell Science which were originally cut from The Health Century due to its huge liability; the admission that Merck & Co, Inc. vaccines have traditionally been injecting cancer viruses (SV40 and others) in people worldwide. Merck was asked to recall 1.2 million doses of Infant Bib vaccines because they were contaminated with SV40 and other lethal additives causing cancer

Reuters, FOX, & Many Others - Dec, 2007

- According to Dr. Andrew Moulden, ALL vaccines elevate the risk of ischemia (a form of stroke), which can then often lead neurological problems, including autism. He shows that vaccines promote blockage to small blood vessels via clotting and elevated white blood cell levels, which can then damage tissues, nerves, and the brain. Please think twice before accepting vaccines for yourself or your children.

- A shocking investigation conducted by researchers and doctors worldwide was confirmed by a piece from CBC, the reputable news agency in Canada, that Polio vaccinations in the 1960's were contaminated with AIDS, not by mistake but because of the result of a white supremacist bio-engineer. They traced the outbreak back to a lab out of Texas where they believe the conspiracy took place.

- As CNN reported and many conclusive studies are finding that Gardasil, the Cancer Vaccine for prevention of Cervical Cancer in women (HPV Vaccine), is causing severe auto-immune diseases, neurological breakdowns, seizures, and illnesses that are not even classified yet which cause central nervous system dysfunctions. Gardasil has caused tens of thousands of negative reactions and even death. Some illnesses are so bad that healthy girls, some who were cheerleaders and athletes, CNN reports, caused complete breakdowns in the girls to wheelchair confinement and morphine prescriptions to deal with severe pain.

- For years a growing debate over the safety of Thimerisol in some vaccines as a preservative may have side effects. Thimerisol, also known as Merthiolate, is a mercury containing compound also sometimes used as a local antibacterial agent. Lethal Mercury poisoning can be caused in even extremely low doses and studies are showing possible links to neurological damage and some doctors are making the case that it might be one of the root causes of Autism. For a long time, lead was thought to be harmless in small parts per million but studies showed that it caused lethal reactions and neurological damage in paint and gasoline which is why lead was taken out of these products, even at the small parts per million quantities they were present. Why is Mercury in vaccines?
